Dual study program in data science and artificial intelligence

Description

+++ DATA ARCHITECT +++

The dual study program **Data Science and Artificial Intelligence** at DENKINGER gives you the opportunity to play an active role in shaping the digital world of tomorrow. Our focus is on the use and analysis of large amounts of data as well as the development and implementation of innovative AI solutions that improve business processes and create new business models. Together with the [DHBW Ravensburg](#) you will acquire the theoretical and practical skills you need to develop data-driven decision-making processes and automated systems.

What can you expect?

You will learn how to generate decision-relevant insights from data and develop AI-supported applications such as voice assistants and chatbots. Your studies will provide you with in-depth knowledge in data analysis, machine learning and the optimization of complex systems, which you will put directly into practice – be it in the optimization of logistical processes or the development of smart assistance systems.

Your contribution to the future

Data is at the heart of modern companies. With us, you will become an expert in tapping into this resource, increasing efficiency and developing forward-looking, digital solutions.
